WORK EXPERIENCE

Senior Officer

Development Bank of Singapore

07/2019 - Present

ADA- Big Data Platform

Achievements/Tasks

- Developed multiple Microservices using spring boot and hibernate framework
- Various validation steps on data are added while promoting data to higher environments
- Used Scrum Agile Methodology in my work (Daily Scrum Meeting, Sprint Backlog) to deliver quality product to client.
- Integrated spring boot applications with grafana dashboard to closely monitor the logs of the application.
- Automated deployment process to openshift using jenkins (CI/CD) pipelines

Software Engineer

Belfrics Blockchain Technology

05/2018 - 02/2019

Achievements/Tasks

- Understanding Blockchain Technology (The technology behind the working of cryptocurrency world) and dapps
- Developed Django application (Verifier App) which will closely work with Belerium Blockchain
- Implemented different levels of authorization and authentication based on user roles

Student Glug Member

Glug

Achievements/Tasks

- Developed algorithm for hand cricket game.
- Integrated with android application and created app.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

MVGR College of Engineering

2014 - 2018

80.89%

Higher Secondary School

Narayana Junior College

2012 - 2014

92%

Secondary School

Sri Krishna Vidya Mandir

2011 - 12/2012

9.8GPA

SKILLS

JAVA

SPRING BOOT

JPA

HIBERNATE

BLOCK CHAIN

PYTHON

DJANGO

GIT

JENKINS

MARIA DB

OPENSIFT

AWS

PROJECTS

ARTIFACT BUILDER

- Spring boot application for packaging the metadata of the spark jobs which contains info about - inputs, outputs, transformations on data and push the jar to nexus.

ARTIFACT LIFECYCLE

- Centralized dashboard for internal project teams to manage different versions of jobs(spark, python, etc) from UAT to prod
- A single click deployment process of jobs to promote jobs to higher env by evaluating control checks.

ARTIFACT ONBOARD

- Helps in promoting jobs by creating pre and post installation steps for spark jobs --(hive creation, schema registry, job scheduling)
- Performs control checks which are pluggable,

VERIFIER APP

- A Django application which allows different user roles(super admin, verifier) to verify user certificates
- It works closely with belrium blockchain to get rewards for verifiers for verifying certificates

ACCOMPLISHMENT AND AWARDS

Iconic Team of the year

Top Engineering Team

Top 20k rank in world HackerRank Leadership Board.

Received Bronze and Gold badges in Problem Solving and Python
