💼 WORK EXPERIENCE

JULY 2019 – PRESENT

SENIOR OFFICER (Data Engineering)
DBS Bank, Hyderabad

- Artifact LifeCycle ia a centralized tool which is used by internal project teams to manage different versions of jobs from UAT to prod. It is used to validate jobs and promote jobs to different environment by evaluating different security validations.
- It communicates with different applications like onboarding, jenkins pipeline, etc.

Jenkins   Beenzoo   mysql

MAY 2018 – JAN 2019

DJANGO DEVELOPER
Belfrics BlockChain Technology, Bangalore

- The prroject I have done during this phase is creating verifier app in django which takes document from the user and shows it to verifier who logs into this app. Verifier app makes api call to another platform to have security for the records.
- It works closely with belrium blockchain to get rewards for verifiers.

Django   Angular   mysql
